

Meet EUDR with confidence

System-enforced compliance, from purchase order to customs clearance.

The EU Deforestation Regulation (EUDR) requires you to prove that regulated goods are deforestation-free, legally produced, and backed by a due diligence statement (DDS) before they move. Spreadsheets and disconnected systems make that hard to manage at scale. IFS Forest Trace is an EUDR compliance solution for IFS Cloud. It brings DDS tracking into the processes you already run, so compliance starts when an order is confirmed, not when goods reach customs.

EUDR enforcement begins December 30, 2026 for non-SME operators and June 30, 2027 for micro and small operators. Maximum fines can reach at least 4% of annual EU turnover. Forest Trace creates an EUDR record for each purchase order line, links DDS references to lots and serials, and produces customs-ready extracts on demand. Teams can see which submissions are pending and which are ready at a glance.

What IFS Forest Trace delivers

Compliance built into daily operations, from the first purchase order to the final customs report.

Records created at purchase

Each confirmed purchase order line creates an EUDR record automatically. Origin country, receiving country and HS code are checked against the rules, so gaps surface when orders are confirmed, not at customs.

Traceability to every lot

DDS references link to the lot or serial number of each part. When goods arrive in different lots, the record splits automatically, with the quantity for each lot.

Customs-ready reporting

Export filtered JSON, CSV or XML extracts for customs clearance on demand, with automated snapshots for your records.

Less manual work

Stop tracking DDS numbers in spreadsheets. Enter each DDS number once and keep it with the right lot. A direct connection to EU TRACES retrieves DDS numbers without manual re-entry.

IFS Forest Trace is part of the IFS Cloud Platform and integrates with IFS Intelligence.

Learn more about how IFS Forest Trace can help your business at ifs.com.

IFS is the world's leading provider of Industrial AI and enterprise software for hardcore businesses that make, service, and power our planet. Our technology enables businesses which manufacture goods, maintain complex assets, and manage service-focused operations to unlock the transformative power of Industrial AI™ to enhance productivity, efficiency, and sustainability.
