

IFS software solutions for Defense facilities management

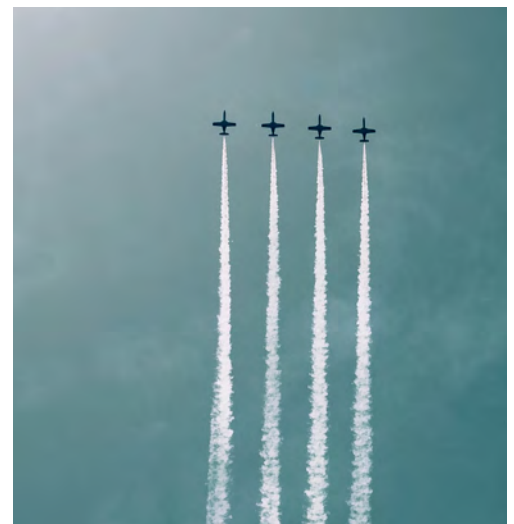

Enabling safe, secure, and efficient facility operations

Defense facilities are key to national defense: efficient operation, facility capacity utilization and site security and safety are important factors in ensuring a ready and capable defense force.

Whether contractor or DoD/MOD managed and operated, defense and military facilities present complex maintenance and project planning challenges, in highly secure and often remote areas.

As part of the holistic suite of defense capabilities provided by IFS, our facility management solutions support the software needs of a wide range of defense facilities, including Shipyards, Operational Bases, Training Facilities, Air Fields and Maintenance Depots.

Our solutions cover the entire facilities planning and operations landscape, from large project management to daily logistics and servicing activities, providing flexible and responsive solutions to adapt to ever changing needs.

Some examples of defense facilities supported by IFS:

Large-scale refit facilities for complex assets

IFS software is used to manage a number of naval bases, supporting the refit and manufacture of naval vessels as well as supply chain, procurement and workforce management.

Operational military bases

Management of military bases involves a complex network of agency and contractor suppliers – IFS is able to provide an actionable overview of this landscape.

Service technicians operating within defense properties

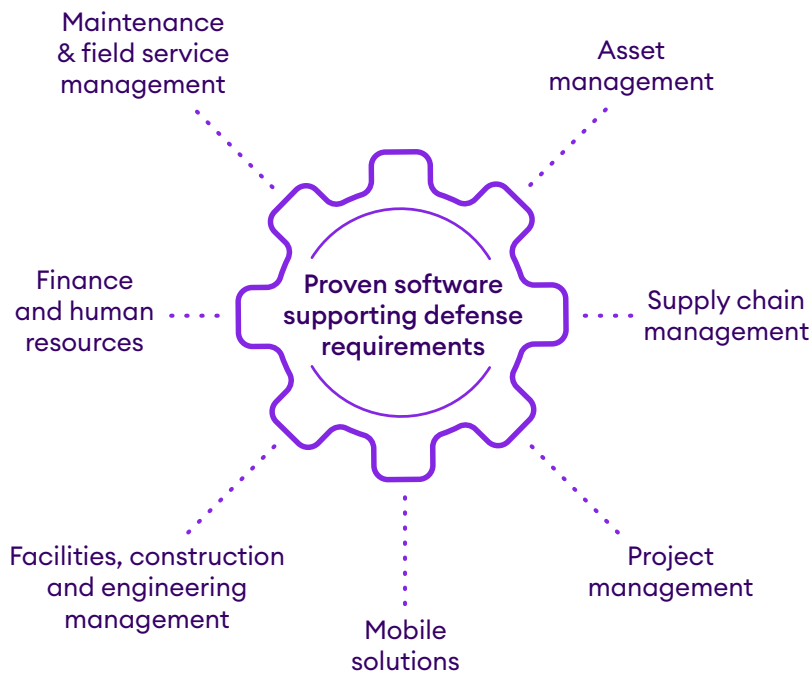

Private facilities management contractors are able to optimize their work force utilization, improve first time fix rate and reduce time to invoice.

Training centres - asset and facilities sustainment

In order to ensure the military can train and educate the best possible next generation, their training and education equipment and facilities need to be modern, effective and in working order.

IFS software capabilities supporting defense facilities management

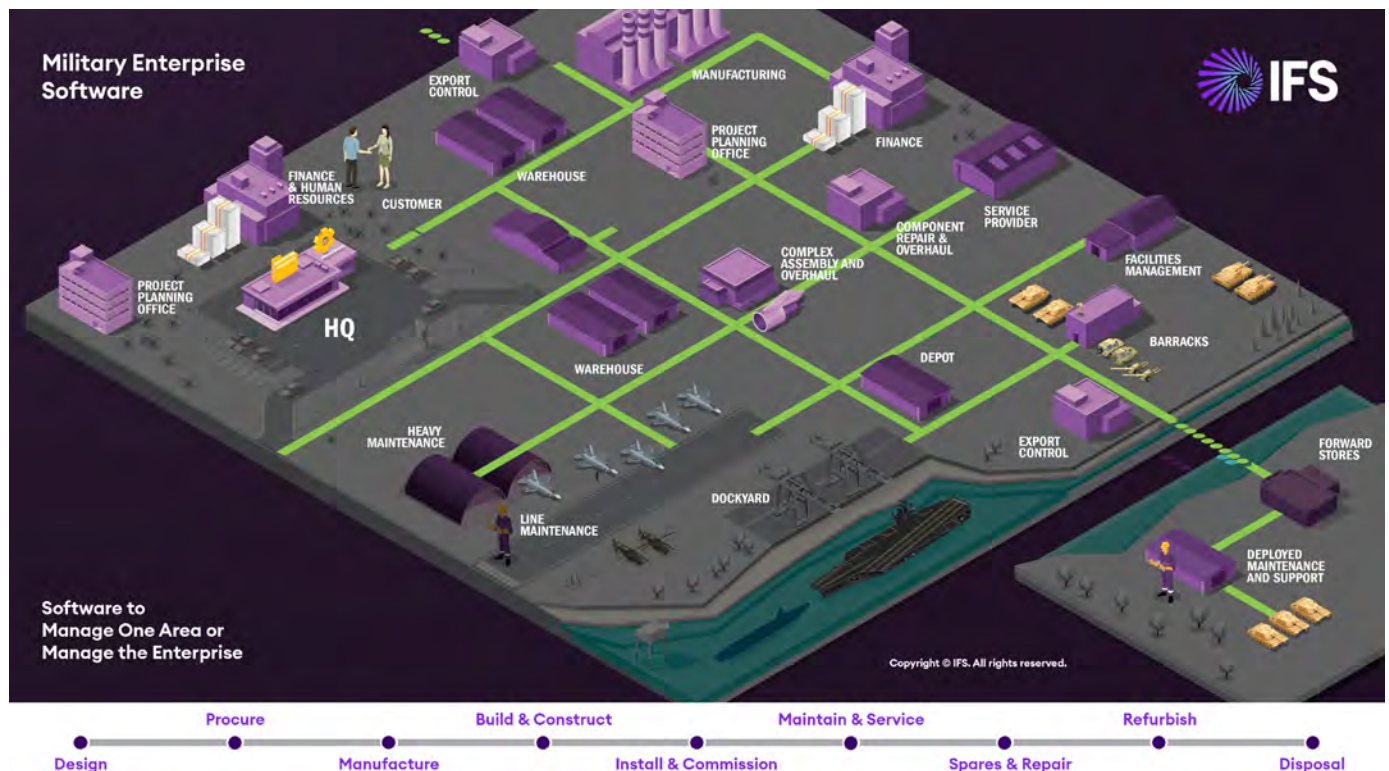

Software designed for defense

With our off-the-shelf software designed for defense and secure, regulated environments, your IT department can focus on providing solutions that maximize your organization's capability, rather than just maintaining a customized offering.

Connecting with your mission support

No system can work in isolation. IFS's secure COTS solutions are designed to integrate into your wider landscape while remaining upgradable to move with your business.

To best support your mission critical asset and facility availability, IFS solutions seamlessly integrate asset maintenance management and supply chain capabilities into your wider IT landscape—regardless of vendor – as required.

IFS develops and delivers cloud enterprise software for companies around the world who manufacture and distribute goods, build and maintain assets, and manage service-focused operations. The industry expertise of our people and of our growing ecosystem, together with a commitment to deliver value at every single step, has made IFS a recognized leader and the most recommended supplier in our sector.
