

# IFS Consulting Services

Project deliveries and fit-for-purpose solutions

The IFS Consulting Team defines, develops and implements fit-for-purpose solutions to support and achieve defined business processes and objectives for IFS customers.

Our Consulting Services focus on the successful delivery of Implementation and Upgrade Projects. IFS has developed methodologies, processes, and tools that make implementations faster, more impactful, and achievable with lower risk.

Our consulting team of over 1500 subject matter experts bring together a wealth of knowledge to ensure your journey with IFS software is both transformative and efficient. IFS Consulting offers organizations global expertise combined with local knowledge to provide end-to-end services, including technical and functional assistance.

We are committed to delivering value, driving efficiency, and meeting your goals.

IFS Consulting Services bring several benefits to your organization, including:

#### **On-time and on-budget implementation:**

**Implementation:** Roll out software on-time and on-budget while aligning with industry needs and business requirements.

#### **Smooth upgrades:**

Structured steps ensure compliance and aid ongoing strategic planning

#### **Fit-for-purpose solutions:**

Tailor IFS software to your specific requirements.

#### **Lifecycle engagement:**

Partner with IFS Consulting throughout the lifecycle with optimization, maintenance, and change management

## Services include:

### Comprehensive Implementation

Leverage our expertise to implement IFS software, remotely or in the cloud, utilizing IFS toolsets and methodologies. Our IFS Implementation Methodology™ ensures a structured approach to rollout within a framework tailored to your specific industry and business requirements. Drive successful implementations within timelines and budget, enabling your organization to realize the potential of IFS solutions fully.

The IFS Implementation methodology is supported by five main phases:

- 1. Initiate project**
- 2. Confirm prototype**
  - Confirm that solution scope meets requirements and build the prototype solution.
- 3. Establish solution**
  - Verify that the established solution fulfills agreed requirement and solution.
- 4. Implement solution**
- 5. Implementation go-live**

### Structured Upgrades to IFS Cloud

Transition smoothly from legacy versions of IFS software to IFS Cloud with a proven framework. Our structured steps support successful upgrades, ongoing compliance, and strategic planning for sustained growth. Embrace the future with confidence, knowing that your IFS software is up-to-date and optimized for your evolving needs.

The IFS global upgrade methodology is supported by five main phases:

- 1. Engage the customer:** Advise on upgrade benefits, opportunities, and budgetary estimate.
- 2. Roadmap Discovery:** Perform value discovery and agree upgrade strategy.
- 3. Upgrade Solution:** Uplift and design the new solution. Prepare training and change management.
- 4. Upgrade Rehearsal:** Prepare receiving customer, validate cut over, and prepare go-live.
- 5. Upgrade Go-Live**

### Tailored Solutions for Unique Needs

Enhance or modify your basic IFS Cloud functionality to align with your specific business requirements. Our IFS Tailoring options encompass Configurations, Reports, Integrations, and Modifications (CRIM). Enjoy a tailored IFS experience that aligns with your organization's unique processes and goals.

### Lifecycle Engagement

Complement your IFS implementation project with IFS Success Support Services – a premium service designed to help you maximize the value of your investment across your entire engagement lifecycle.

### Benefit from:

- Project governance and guidance to align with IFS best practices. This can be delivered to projects implemented directly by IFS or projects implemented by an IFS Partner.
- Guidance and advice for IFS-led implementation projects encompassing all areas a customer is responsible for executing, such as establishing an appropriate organizational structure or processes.
