

IFS Merrick is an end-to-end production solution that helps oil and gas companies monitor and improve production operations and results through the effective collection, accounting, and reporting of accurate and validated production data. IFS Merrick is optimized for all types of operations – onshore/offshore and conventional/unconventional.

## Key product facts

1. IFS Merrick manages over 500,000 wells nationwide (more than half in the U.S.).
2. IFS Merrick embodies the industry standard in production software with nearly 30 years of market experience.
3. IFS Merrick is the leader in mobile field operations solutions used by more than 22,000 field operators.
4. Merrick is used by top 10 operators in every major shale play.

## Improved efficiencies

- Clearly defined process flows
- Field data capture in one central repository
- Proven integration points

## Greater value

- Reduced downtime and deferments
- Complete production automation
- Full management of well performance

## Benefits

**Replaces** spreadsheets and manual, error-prone processes with best-in-class software that boasts an intuitive UI built for growth-oriented customers

**Eliminates** disparate systems, and ensures accurate and up-to-date production data for every well

**Ensures** accurate hydrocarbon allocations that drive revenue payments and royalty distributions

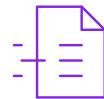

**Reduces** unplanned downtime through preventative maintenance and optimizing well production

**Integrates** field operations, production data management, operational intelligence, and forecasting

**Automates** time-consuming production practices enabling staff to be more efficient

**Streamlines** cross-department communication allowing for faster exchange of data and information

## Features

- Configurable software that can be implemented in as little as three months
- Available as a cloud-based or on-premise solution
- Integration with most third-party systems/applications
- Automated data capture
- Pre-configured production workflows
- Ability to easily generate reports to analyze data
- Active and supportive user community
- Easy to learn (intuitive navigation and logical structure)
- Scalable to manage and support 10 to tens of thousands of properties
- The industry standard in field data capture and operations solutions

IFS develops and delivers cloud enterprise software for companies around the world who manufacture and distribute goods, build and maintain assets, and manage service-focused operations. The industry expertise of our people and of our growing ecosystem, together with a commitment to deliver value at every single step, has made IFS a recognized leader and the most recommended supplier in our sector.

## Integrations and modules

Combine these with IFS Merrick for increased functionality and an enhanced user experience.

### IFS Energy & Resources – Field Operator

A mobile field operations solution designed for today's upstream oil and gas environment. The solution combines seamless data capture and measurement validation integrated with SCADA and other data sources. It's also combined with a sophisticated route surveillance engine that enables operators to pump by exception with task management, run ticket imaging, and collaboration across disciplines and departments.

### IFS Energy & Resources – ProCount

A hydrocarbon accounting solution that provides flexibility and reliable accuracy for simple to complex allocation systems with multi-tier relationships between wells, tanks, meters, and other equipment.

### IFS Energy & Resources – Carte

A reporting and analytics solution that enables customers to visualize, graph, and analyze production data by a single well, field, or across all assets.
