Take your business to new heights with IFS Cloud

**Sustainability Management:** Empowers customers to confidently navigate complex and evolving global regulations, including the Corporate Sustainability Reporting Directive (CSRD) and International Sustainability Standards Board (ISSB), while enabling consistent, transparent, and robust reporting on environmental, social, and governance (ESG) metrics.

**Emissions Management:** Delivers accurate, enterprise-grade carbon footprint calculations across Scope 1, Scope 2, and critical Scope 3 categories, ensuring comprehensive emissions visibility and accountability.

**Circular Operations:** Drives circular economy initiatives through advanced remanufacturing and refurbishment capabilities, while Eco-Footprint and related tools enable precise tracking and optimization of material reuse and product lifecycle performance.

**Supply Chain Sustainability:** Provides end-to-end ESG visibility across the supply chain with powerful tools for tracking, reporting, and engaging suppliers.

**Performant and Sustainable Assets:** Optimizes asset performance, minimizes maintenance costs, enhances reliability, and reduces emissions.

In turbulent times, the most resilient businesses are sustainable by design. With IFS Cloud, you embed sustainability into operations to drive efficiency, profitability and compliance.
