

5 reasons why HCM in IFS Cloud adds value to your business

A solution designed to power your unique HR requirements in IFS Cloud.

Human Capital Management (HCM) in IFS Cloud has been built to be the central point that contributes to setting your HCM strategy and connects your people to your key functional areas including Manufacturing, Supply Chain, Finance, Service, Projects and more so you can ensure you have insights and full visibility of your global workforce.

Why does it matter to your business?

One single solution

Achieve higher efficiency and productivity to support and manage your global operations' needs with a single solution. Get the insights and visibility you need and have the right people at the right time on the things they need to do. Follow up time and attendance and expenses whilst also supporting talent development and business growth.

From hire to retire

HCM in IFS Cloud has been designed to manage and support your workforce's full employee lifecycle, from hire to retire through a comprehensive solution that supports all areas of human resource management. From headcount planning, recruiting, onboarding, career planning, development, and training, to requirements like health & safety, time & attendance, and travel management.

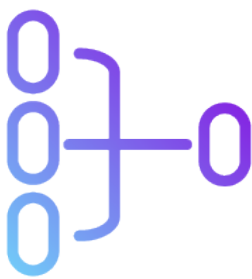

Superior employee experience

Support ever changing employees needs with effective and user-friendly self-service portal and tools available from a browser or application on any device.

Enhance and simplify your HR processes

HCM in IFS Cloud was designed with Innovation embedded. Put emerging technologies like AI, automation and machine learning to work in your employee experiences to help get things done faster and more efficiently. Whether it's screening candidates or reporting expenses, you can get value from day one.

Easy to connect

Easily connect with your choice of best of breed solutions such as recruitment, local payroll, etc. (Including SmartRecruiters, Cloud Pay, Criterion, ADP), giving you freedom and choice. Use pre-built integrations and APIs to connect.

Human Capital Management (HCM) in IFS Cloud is a flexible, composable, cloud-native solution designed to manage and support all the complexities of human resource management in the energy & utilities and resources, construction & engineering, aerospace and defence, manufacturing and service industries.

HCM in IFS Cloud enables you to navigate the evolving roadblocks your organization and people might face and exploit a fast-paced, service-driven world through a breadth of capabilities supported by strong reporting and analytics functionality. HCM in IFS Cloud is an ideal technology solution that will support both your current and future needs ensuring you are always at your best when it matters most – at your Moment of Service.
